1 About us

Our software/web/graphic design studio in Penang has been appointed to establish and run a local Technology College's research centre to provide industry standard training for their students.

This ensures that we continue to provide leading edge design and print services here in Australia at our wonderfully friendly rates.

We are bunch of people who are out to enjoy our work.

Oh, we DO take our work seriously, but we are actually doing the things we like doing. Drop in to see us and you risk being knocked over with our enthusiasm especially when you start us on design, software and the question of quality!

And best of all, because we delve seriously into our subjects, we have indeed become quite good at what we do.

That, we believe, bodes well for those who trust us to deliver. We are prepared to go the extra mile, work late nights to make sure the work gets done on time and is up to the quality for which we are known.

As you can see, we do cover a wide range of services. We will not be able to cope if not for the help and support of our customers. It is a 2-way thing. We give our best – always, and this is appreciated by our customers, a number of whom do get involved in various areas. This kind of relationship encourages us further. They give us valuable advice and suggestions which enable us to keep improving.

We work closely with our customers to produce the best outcomes.

“A well equipped press renowned for friendly, reliable and efficient service. Situated in Lilyfield Road, just a minute's drive from Anzac Bridge.
